BUSINESS REVIEW

For the six months ended 30 June 2012, our revenue for distribution business increased 12.5% to US\$45.8 million from US\$40.7 million for the six months ended 2011 mainly due to the increase in revenue in PRC. Despite the growth in revenue for distribution business in HY2012, the segment results from distribution business decreased 27.1% to US\$0.8 million due to lower gross margin for the period as the appreciation of Japanese Yen adversely affected the cost of goods imported from Japan for the distribution business.

Our manufacturing business increased 11.4% to US\$22.4 million for the six months ended 30 June 2012 from US\$20.1 million for the six months ended 30 June 2011. The division benefited from the revenue growth in PRC for our products and the consolidation of a newly acquired subsidiary. However, the segment results from manufacturing business decreased 25.0% to US\$0.3 million in HY2012 from US\$0.4 million in HY2011. This was attributed to the lower selling price in European market.

During the period, the Company acquired the remaining 20% interests in Precisa and a 56% interest in IXRF, a company incorporated in United States of America. These acquisitions are expected to further strengthen the Group's global presence in the industry.

The profit attributable to the owners of the Company was US\$1.1 million for HY2012, representing an increase of 86.6% as compared with US\$0.6 million in HY2011. There were non-recurring expenses of US\$0.8 million in connection with the Company's dual primary listing of its shares in SEHK in HY2011 whereas no such expense was incurred in HY2012.

The sales of our products in PRC increased by US\$5.6 million (12.0%) from US\$46.8 million in HY2011 to US\$52.4 million in HY2012.

Inventories

The inventories increased by US\$7.9 million from US\$32.0 million as at 31 December 2011 to US\$39.9 million as at 30 June 2012, which was mainly due to the level of inventory of raw materials and finished goods stocked up to meet the expected increase in manufacturing and distribution activities.

Trade and other receivables

The trade and other receivables decreased by US\$5.3 million from US\$65.9 million as at 31 December 2011 to US\$60.6 million as at 30 June 2012 as there was seasonal pattern in our business where higher portion of sales were realized in second half of the year, particularly in the last quarter of the year.

Trade and other payables

PROSPECTS (A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months)

According to Strategic Direct International Inc. (SDI), the global scientific equipment industry ("SE") is expected to have a 2012 sales of US\$43.9bn. Although small in comparison to other health industries such as pharmaceuticals, the SE sector provides a relatively non-cyclical and stable annual growth supported mainly by government funded industries and projects.

In addition, according to SDI, the 2007-2012F CAGR of the global SE sector is expected to grow at 4.0% annually, while the Asia Pacific (excluding Japan and PRC) is forecast to reach a CAGR of 6.3%. The PRC remains the fastest growing country in the world for the SE market with sales CAGR of 8.9% and it is expected that the PRC's SE sector will continue to outpace global trend given strong government support. The increasing demand of SE will support the growth of major industries and the annual growth rate of the PRC's SE market is expected to remain around 8% until 2014Forecast.

In view of the above, the Group expects continuing growth in demand for its products from the PRC, which is regarded as its core market, and other emerging markets in Asia such as India and Indonesia. The Group believes that trading condition will remain challenging. That notwithstanding, the Group will continue to leverage on its low cost manufacturing base in the PRC to achieve cost savings and operational synergy for its operations in Europe.

The strong exchange rate of Japanese Yen against USD has adversely affected the cost of goods imported from Japan for the distribution business. Any further appreciation of the Japanese Yen against the USD will impair the Group's distribution segment gross margin.

EMPLOYEES AND EMOLUMENT POLICY

As at 30 June 2012, there were 883 (31 December 2011: 882) employees in the Group. Staff remuneration packages are determined after consideration of market conditions and the performance of the individuals concerned, and are subject to review from time to time. The Group also provides other staff benefits including medical and life insurance, and grants discretionary incentive bonuses and share options to eligible staff based on their performance and contributions to the Group.

Given the size of the Company’s current business operations and nature of its activities, the Board is of the view that it is not necessary to separate the roles of the Chairman and Chief Executive Officer. In addition, three out of six directors are independent non-executive Directors, and that each of the three Board Committees is chaired by an independent director and comprises members who are all independent directors, the Board is of the view that there is an appropriate balance of power within the Board, and that there is no undue concentration of power and authority in a single individual. As such, the Company considers that sufficient measures have been taken to ensure the Company’s corporate governance practices are in line with those in the Code.
